

DCFM

RELIABLE FACILITIES & ENGINEERING SUPPORT

Keeping critical environments running safely, efficiently, and without disruption.

Straightforward support for complex environments

DCFM provides engineering-led facilities management for businesses that rely on everything working exactly as it should.

We support critical environments where downtime, safety, and performance matter. Whether it's installation, maintenance, cleaning, or compliance, we take a practical, hands-on approach to getting things done properly.

We're not here to overcomplicate things — just to deliver reliable work, clear communication, and consistent results.

→ If you need dependable support, we're easy to deal with — just get in touch.

WHAT WE DO

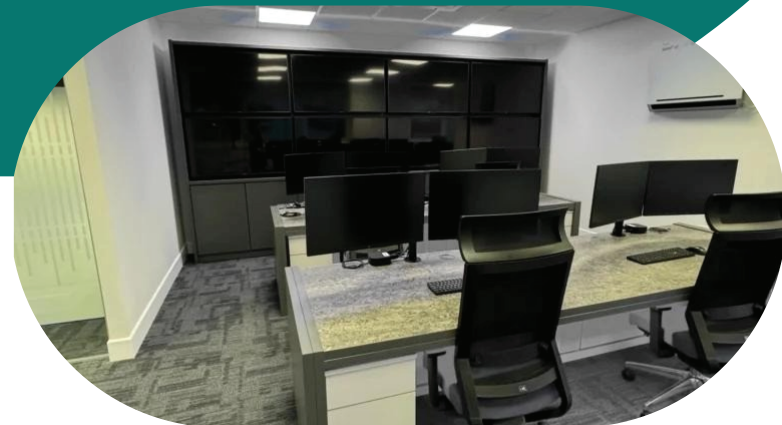

Four divisions. One reliable team

We operate across four key areas, giving you one team that can handle everything.

- . **Build** – Installation and project delivery
- . **Maintain** – Ongoing maintenance and repairs
- . **Critical Clean** – Specialist cleaning for sensitive environments
- . **Fire** – Fire protection and compliance

Everything works together, so you're not dealing with multiple contractors.

One point of contact, everything covered.

Delivered properly from the start

Services:

- . Control rooms and internal builds
- . Security-rated doors and perimeter systems
- . Office and workspace fit-outs
- . Raised flooring for technical environments
- . EV infrastructure and line marking

We focus on getting it right first time to avoid issues later.

We manage projects from planning through to completion, making sure everything is installed correctly and ready to perform.

Planning a project? Speak to us early and we'll make it run smoothly.

Keeping everything running as it should

Our maintenance services are built around reliability. We prevent issues where possible and respond quickly when something goes wrong.

- * Planned and reactive maintenance
- * Electrical, HVAC, plumbing and general repairs
- * Full building support
- * Grounds maintenance

We keep things simple — regular upkeep, fast response, and no unnecessary delays.

➔ **If things aren't running how they should, we'll get them back on track.**

Specialist cleaning for critical environments

We provide specialist cleaning services for sensitive and technical environments where cleanliness, safety and reliability are essential. From data centres and server rooms to post-construction cleans, our team delivers a professional and efficient service with minimal disruption.

Services:

- * **Data centre cleaning**
- * **Server room cleaning**
- * **Post-construction cleans**
- * **Raised floor cleaning**
- * **Dust and debris removal**
- * **Technical environment cleaning**

We work safely, efficiently and in line with site requirements to keep critical spaces clean, compliant and operational.

We deliver fire protection services to keep your building compliant and safe.

- * Fire door installation and maintenance
- * Passive fire protection
- * Inspection and remedial work

All work is carried out to
current standards

If compliance or safety is a concern, we'll make sure it's covered.

WHY CHOOSE DCFM?

A team you can rely on

Clients choose DCFM because we keep things simple and deliver what we promise.

- * We take ownership — no chasing multiple contractors**
- * We do the job properly — not quick fixes**
- * We respond when it matters**
- * We communicate clearly throughout**
- * We build long-term working relationships**

You get a team that treats your facility like it matters — because it does.

If you've had unreliable service before, you'll notice the difference.
